

SafeRise Protocol

SELF-GUIDED NERVOUS-SYSTEM REGULATION

Andre Robley · Founder
Kenor International B.V.
thesaferiseprotocol.com

A finished product in an unconsolidated market, looking for reach.

SafeRise teaches people to recognise the state they are in, regulate it, and recover the capacity to choose what happens next — on their own, in the moment, without a clinician in the room. Thirty protocols are built and the platform enters beta on 30 September 2026.

THE METHOD — ONE SEQUENCE, EVERY PROTOCOL

Recognise

Bring the experience into view,
without diagnosis

Regulate

Enough steadiness to regain
command of attention

Release

Loosen struggle and the demand to
resolve it now

Rise

Return to deliberate participation and
caring action

The same four steps run in every protocol, on every track. **That consistency is the product.** Beneath it sits a three-layer model — capacity, the substrate it depends on (sleep, nutrition, training load), and the application where it lands. Most wellbeing spend touches only the third.

WHY IT SURVIVES SCRUTINY

- **Six frameworks, tiered by evidence.** Porges, HeartMath and Kross lead and stand independently; Maté, Jung and Watts are labelled clinical-practice or interpretive and never presented as mechanism.
- **Clinical governance is a gate, not a footnote.** Four tracks stay unbuilt until a licensed clinician is contracted.
- **Defined by refusal.** Not therapy, not a course, not gamified self-improvement, not an outcome promise.
- **Privacy is structural.** The organisation funds access and never sees what happens inside an account.

TWO MARKETS, ONE LIBRARY

B2C Individuals

The first track is free permanently — the acquisition engine, not a promotion. Everything above it sits behind a single all-access tier.

Personal Transformation · Relationship Healing

B2B Organisations

Eight foundation tracks every employee receives, plus one protocol for their role and one for their industry.

Fourteen roles · sixteen industries · green industry, blue role

WHAT WE ARE BUILDING TOWARD

LIVE NOW

30 protocols, three tracks, plus the free Foundation Protocol

B2C BUILD-OUT

120 protocols across the consumer library

B2B BUILD-OUT

110 the Foundation 8 plus thirty role and industry protocols

WHAT I AM RAISING

Capital, and the two things that make capital work. Three cases, each sized to what it unlocks: a **catalytic** amount that completes launch and puts the first paying members through; a **validation** amount that adds clinical governance and two corporate pilots; and a **pre-seed** that opens B2B distribution. Alongside it, an introduction to the right employer or a pilot inside an organisation you can influence moves this as far as the cheque does.
